

QUALITY DATA COLLECTION

FIELD GUIDE

Maintain Consistent Soil Scene

Avoid irregularities you may encounter within a field like: grain cart and combine wheel tracks; crop residue patterns (pictured here). You may need to map at an angle or adjust your AB line to keep a consistent scene for the sensors.

Out Rear Window

Monitor implement; depth wheels are turning, no plugging.

Guidance System

Consistent soil scene is more important than swath consistency

Monitor Camera Screen

Check soil flow through pH Sampler
